Top Skills

ASP.NET Core

JavaScript

SQL

Jacob Lewinski

Senior Software Engineer

Huntsville, Alabama, United States

Summary

I am an experienced software developer specialized in building web applications that enhance the lives of the others. I have a strong foundation with years of experience using ASP.NET Core MVC with vanilla JS. Recently, I have helped multiple projects grow by modernizing the tech stack to include a frontend framework like Svelte and React. I have enjoyed experimenting with different technologies and the differences in performance and developer experience.

When I'm not working or learning, I am a loving husband and father. Lately I have been cherishing the time I get to play with my one-year-old daughter and going on dates with my amazing wife.

Experience

Alliance Technical Group

2 years 1 month

Senior Software Developer

September 2024 - Present (1 year)
